

Flagship Fleet Management, LLC.

Complete Solutions

Flagship SQL: The complete fleet management solution. Designed for larger fleet operations looking to aggressively manage all aspects of fleet. The complete solution for; Maintenance Tracking, Preventive Maintenance Notification, Shop Scheduling/Balancing, Replacement Analysis, Inventory Management, Motor Pool Management and Vendor performance monitoring.

Flagship Lite: The fleet maintenance solution. The fleet maintenance solution designed for the smaller fleet operation. Entry level system for automating maintenance data and tracking preventive maintenance cycles.

Enhancement Solutions

Fleet Compass: The fleet maintenance analysis and reporting tool to work with your existing fleet management system. Optional modules include:

Scheduler: Make equipment maintenance scheduling work for you. A simple solution to a complex problem. A powerful tool to balance the work load with minimal set-up.

Motor-Pool: The motor pool screen is a marvel of simplicity. Every process concerning the act of renting vehicles is handled from one screen.

Fleet Navigator: The ad-hoc analysis module for determining utilization and in depth analysis. Provides a standard frame work to allow users to build complex data sets.

Fleet Billing: For sites that require a simple way of providing a clean monthly billing and assigning costs to individual organizational units. This application will interface with your existing fleet management system.

Fleet PM: Provides tool for notifying equipment users when equipment is due for preventive maintenance. Notifications can be delivered automatically via email, notifications at fuel pump or paper.

Fleet Replace: Replacement Analysis. The core of Fleet management. Keep equipment too long and maintenance will become overburdened. Disposing of equipment too early and you lose some of the useful life. We want to show you the best place to replace.

Fuel Processing Module: The Flagship fuel processing module is designed to make short work of the process of loading fuel transactions into your fleet management system.

Flagship Fleet Management, LLC.

Data interfaces

We have the experience to make the connection. We take control of your data so it does not control you.
